Fullstack developer intern

Versatile MERN Full Stack Developer skilled in building and maintaining dynamic web applications using React, TypeScript, Node.js, and MongoDB. Experienced with RESTful APIs, agile workflows, and deployment pipelines. Strong collaborator and self-starter, passionate about writing clean, scalable code and solving real-world problems.
Currently seeking Summer 2025 internship opportunities.

WORK EXPERIENCE

Techies collab and upskill — 02/2025 - Present
Frontend Developer — Nigeria

- Developed and maintained responsive user interfaces using frameworks like Next js.
- Translated UI/UX design wireframes and mockups into functional, pixel-perfect components.
- Implemented reusable component libraries to ensure consistency and scalability across projects.
- Used version control systems like Git and GitHub to manage codebase and streamline collaboration.
- Participated in Agile/Scrum sprints, providing regular updates and feedback during stand-ups and retrospectives.
- Integrated RESTful APIs and handled asynchronous data fetching using tools like Axios or Fetch API
- Collaborated closely with designers, backend developers, and product stakeholders to deliver high-quality user experiences.

Augustine University — 10/2023 - Present
Student — Ilara-Epe, Lagos, Nigeria

- Led collaborative team projects using Agile methodologies, ensuring successful planning, development, and deployment.
- Designed and built multiple solo full-stack applications, including an e-commerce platform, a job application tracker, and a responsive clone of Apple's official website to showcase UI/UX precision and frontend skills.
- Mentored fellow students in programming, providing guidance on coding concepts, debugging practices, and project development, fostering collaborative learning and technical growth.

Novaji Introserve — 07/2024 - 09/2024
Website Developer — Ikeja, Lagos

- Collaborated closely with UI/UX designers to translate wireframes and prototypes into fully responsive, interactive web interfaces using HTML5, CSS3, JavaScript, and modern frameworks like React.
- Ensured cross-browser compatibility and conducted thorough testing across multiple devices using tools like Chrome DevTools and BrowserStack.
- Gained hands-on experience building full stack applications using technologies such as JavaScript (React, Node.js), Express, MongoDB/MySQL, and RESTful APIs
- Utilized AI-powered development tools (e.g., GitHub Copilot, ChatGPT) to accelerate coding workflows, debug efficiently, and enhance the quality and scalability of web applications.
- Refined deployment pipelines through integration of automated testing frameworks and continuous deployment tools, supporting robust code quality and seamless updates for client-facing applications.

EDUCATION

Bachelor's

Augustine University • GPA: 4.03   Ilara-Epe •Lagos

- Took on leadership roles in several group projects, helping organize tasks, guide team discussions, and support the team through each stage of development — from planning and design to coding and final deployment.
- Demonstrated strong problem-solving and communication skills by serving as the main point of contact between team members and lecturers, helping ensure our project met both technical goals and assignment requirements.
- Used Git and GitHub to manage version control, implement branching strategies, and maintain code quality across individual and team-based projects.
- Always eager to learn and grow as a developer by building side projects, experimenting with new tools, and engaging with the open-source community when possible.

SKILLS

HTML/CSS, JavaScript, MongoDB, Nextjs, Node.js, React, RESTful APIs, tailwindcss, Typescript
